

Znanstveno raziskovanje in Inženirsko načrtovanje

THE SCIENTIFIC METHOD

1 QUESTION

Pick something you're curious about.

2 HYPOTHESIS

Make an educated guess at your question's answer.

3 EXPERIMENT

Make a plan & test your hypothesis.

4 DATA

Record your experiment's results and your observations.

5 ANALYZE

Review and draw conclusions.

6 REPORT

Explain your results and whether your hypothesis was correct.

THE SCIENTIFIC METHOD

1 QUESTION

Pick something you're curious about.

2 HYPOTHESIS

Make an educated guess at your question's answer.

3 EXPERIMENT

Make a plan & test your hypothesis.

4 DATA

Record your experiment's results and your observations.

5 ANALYZE

Review and draw conclusions.

6 REPORT

Explain your results and whether your hypothesis was correct.

Od kje pride vprašanje?

“Educated guess” - na podlagi česa?

Kako testiramo hipotezo?

Čemu? Saj smo že testirali hipotezo...

Zakaj sploh to počnemo? Kaj kakšno korist imamo od novega znanja?

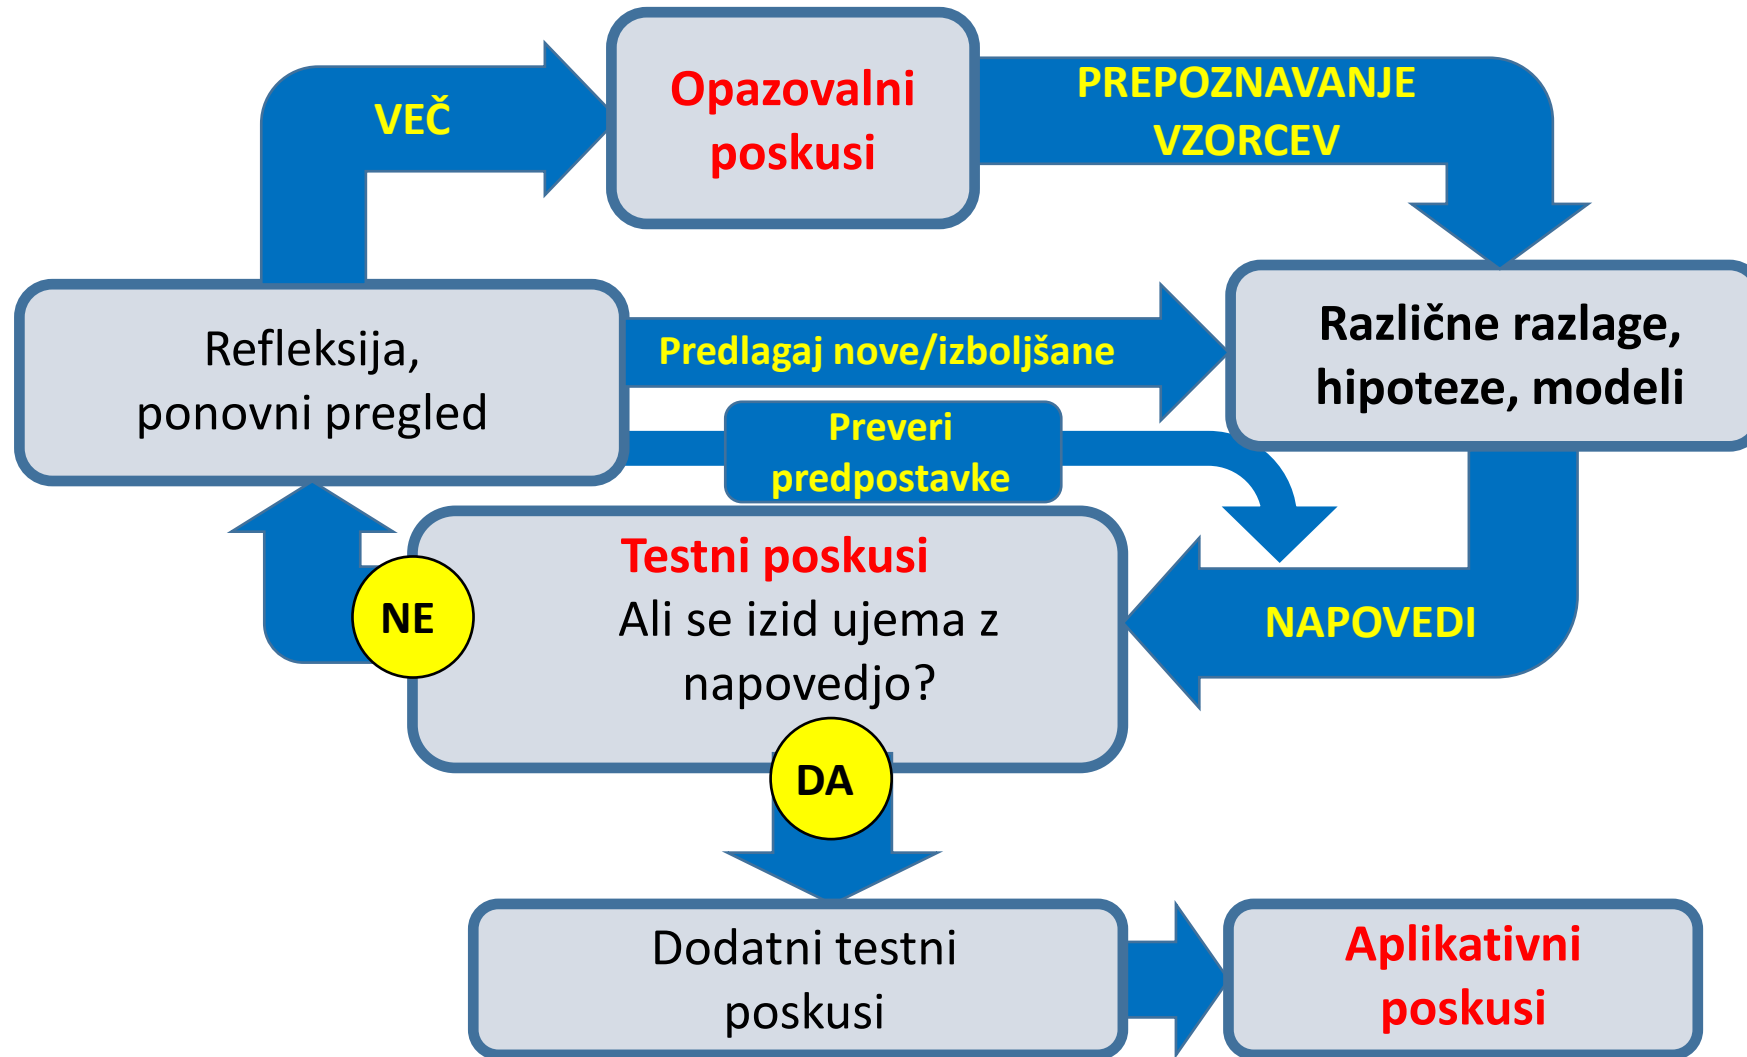

Kako znanstveniki običajno gradijo znanje?

Obstaja več predstavitev tega procesa, toda v glavnih idejah so si podobne. Glej npr. Understanding Science

<https://undsci.berkeley.edu/index.php>

Primer: ISLE (hkrati Teoretski okvir za poučevanje znanstvenih kompetenc)

Investigative Science Learning Environment (ISLE)
Znanstvenoraziskovalno učno okolje

Kako inženirji predstavljajo zaporedje korakov, ki mu sledijo pri svojem delu?

Obstaja več predstavitev procesa, ki mu pravijo *Inženirsko načrtovanje*. Glej npr. <https://www.sciencebuddies.org/science-fair-projects/engineering-design-process/engineering-design-process-steps>

Kolikor vem, ni razvitega še nobenega teoretičnega okvirja za poučevanje inženirskih kompetenc.
